WHY INVEST

Caldwell U.S. Dividend Advantage Fund provides investors with attractive current income and total return potential by investing primarily in high-quality, U.S. dividend-paying companies with compelling valuations and good prospects for continued business and dividend growth.

KEY FEATURES

- Attractive yield paid monthly, plus capital appreciation potential
- High-conviction, differentiated portfolio that typically results in a high active share
- Focus on “Dividend Champions” – companies with strong returns on capital that consistently increase their dividend
- Access to small/mid-cap sector – exposure to companies with strong free cash flow and growth prospects that may be overlooked by other dividend mandates
- Dividend growers have historically outperformed with less volatility
- Emphasis on capital preservation – avoids highly cyclical sectors and unproven business models

THOUGHTFUL INVESTING

¹The Fund was first offered to the public as a closed-end investment since May 28, 2015. In November 2018, the Fund was converted into an open-end mutual fund and all units outstanding at the time were redesignated as Series F and a new Series (Series A) was launched. Performance prior to the conversion date would have differed had the Fund been subject to the same investment restrictions and practices of the current open-end mutual fund.

²As at March 31, 2021. Active Share, represents the proportion of portfolio holdings that differ from those in the benchmark (S&P/TSX) Index. It is calculated as the sum of the absolute difference in allocation between each portfolio security and Index constituent, divided by two.

³Sector Allocations, determined internally, include Cash.

⁴As of December 31, 2020.

The information contained herein provides general information about the Fund at a point in time. Investors are strongly encouraged to consult with a financial advisor and review the Simplified Prospectus and Fund Facts documents carefully prior to making investment decisions about the Fund. Caldwell Investment Management Ltd. makes no representations or warranties on the accuracy and completeness of the information included and sourced externally. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Rates of returns, unless otherwise indicated, are the historical annual compounded returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base (“ACB”) will be reduced by the amount of any returns of capital and should your ACB fall below zero, you will have to pay capital gains tax on the amount below zero.
