

CALDWELL BALANCED FUND

June 30, 2017

About Caldwell

We are a 100% employee controlled firm that has been providing investment solutions to individual and institutional clients for over 35 years.

Investment Strategy

The fund aims to own 20-30 stocks that exhibit the best risk-adjusted opportunities across Canada and the U.S. Stocks are selected based on a disciplined investment process where capital protection acts as the foundation for generating positive returns.

This includes a focus on stocks where the valuations are compelling, management and balance sheets are strong and challenges are temporary in nature. Fluctuations in the stock market are offset by holdings in government guaranteed bonds and treasuries. The result is a fund that gives investors upside potential, while limiting downside risk.

Reasons to Own

1. Actively managed, 20-30 stock portfolio
2. Disciplined, process driven buy and sell decisions
3. Monthly updates on portfolio changes and significant developments

The information contained in this report is designed to provide you with general information related to investment alternatives and strategies and is not intended to be comprehensive investment advice applicable to the circumstances of the individual. We strongly recommend you to consult with a financial advisor prior to making any investment decisions. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing in this product. The indicated rates of return are the historical annual compounded total returns including changes in share and/or unit value and reinvestment of all dividends and/or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero. The inception date of this product is March 1, 1990. Principal distributor Caldwell Securities Ltd.
