### How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

### Risk Rating

Caldwell Investment Management Ltd. has rated the volatility of this Fund' as **Low to Medium**. This rating is based on how much of the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the Risk section of the Fund's simplified prospectus.

## No guarantees

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

## How has the fund performed?

## Who is this fund for?

### Investors who are:

- looking for long term investment
- seeking equity exposure to companies throughout the world, and
- willing to accept moderate investment risk

## A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much income tax you pay depends on the tax laws where you live and whether or not you hold the Fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

## How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell Series A units of the Fund. The fees and expenses—including commissions—can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

	Annual rate (as a % of the fund's value)

#### More about Trailing Commissions

The trailing commission is an ongoing commission. It is paid for as long as you own the Fund. It is for the services and advice that your representative and their firm provide you.

The Manager pays the trailing commission to your representative's firm. It is paid from the Fund's management fee and is based on the value of your investment. The rate depends on the sales charge option you choose:

Sales Charge Option	Amount of Trailing Commission
